## Advanced Threat Protection: Sandboxing

Organizations breached by Advanced Persistent Threats (APTs) are all over the news and has become a real pain point for various organizations. We at Network Techlab got a remedy to your end to end organizational needs. We have complete portfolio of Network Security solutions which will help you to fight these new malwares creeping in the market. To enhance your Network security, Network Techlab brings you Sandboxing security solution.

### Why Do You Need Sandboxing?

Sandboxing with ADVANCED THREAT PROTECTION Protects your organizations against advanced and ransomware attacks. Sandboxing is able to detect threats that other security may miss by coaxing those threats into exposing themselves.

Sandbox aims to replicate the behavior of real end-user systems in order to execute and even accelerate malicious code as it is intended to run in order to detect it. In order to assess malware, sandboxes will run multiple code evaluation processes with different operating systems and technologies. Sandbox prioritizes code evaluation processes by how prevalent malware is in different configurations in order to speed up the identification of malicious code.

### Benefits:

- Prevent data breaches caused by ransomware and advanced attacks
- Detect advanced persistent threats
- Expose previously unknown malware
- Block more spear phishing attacks
- Increase effectiveness of your NGFW, or UTM or Secure Email Gateway solution

# Data Center & DCIM

## Smart Data Center Solutions

With more than 20 years of dedicated experience in the development and management of large scale Data Center deployments, NTIPL is presently the best in class, organization capable of offering other organizations a true end-to-end solution for their Complete Data Center. Smart Solutions aims to provide a suite of enterprise-class IT infrastructure solutions to small and medium businesses and enterprises. Smart Solutions addresses varying applications and scale based on your current IT infrastructure setup. Every Smart Solution scenario takes into account your concerns and needs rather than push a bundle or boxed solution.

### SmartRow

SmartRow solves all the common problems faced by IT management, fulfilling IT needs without building new data center space. Think of SmartRow, it is a data center in a row a simple, fully integrated row-based infrastructure. SmartRow combines up to six data center racks with precision cooling, UPS, power management, monitoring and control technologies, and fire suppression all in an enclosed system.

### Best Suited For:

Banking, Financial and Insurance Data Center/Collocation/Hosting Education Government Professional Services Retail and Wholesale.

Smart Row

## SmartCloset

SmartCloset is the new standalone self-contained rack from Vertiv, along with inbuilt power and cooling. It facilitates the housing and trouble-free installation of active IT equipment like switches, routers, servers and so on – for which, an open environment is not conducive for healthy performance.

### Best Suited For:

Banking, Financial and Insurance Broadcast and Entertainment Data Center/Collocation/Hosting Education Fire/Alarm/Security Government Health care Retail and Wholesale.

Smart Closet

## SmartCabinet

The SmartCabinet enables Enterprise Class IT Infrastructure through the provision of integrated enclosure, power, cooling and service. Critically it also enables the most vital element - namely 360° visibility of all system components.

### Best Suited For:

Telecom Data Center / Networking Rooms / Small Server Rooms / Hub Rooms.

Smart Cabinet

## Turnkey Data Center

Our Turnkey Data Center portfolio showcases our unique collaborative design-build process which delivers 0.5-30+ MW capacity for greenfield or brownfield sites that is deployed up to 50% faster than traditional construction and is optimized to solve each customer's individual challenges.

### Best Suited For:

Telecom Data Center/Collocation/Hosting Construction and Engineering.

Turnkey Data Centers

# Office Automation

## Take your Business to the next level with uniFLOW an Output Management Solution.

We at NTIPL ensure that we provide the perfect mix of the latest technology product and a world class services which assist the users with the right document management solution. The following are the key features of the document management solution that network Techlab provides:

- Easy access
- Easy to search
- Better collaboration
- Added security
- Saves space
- Disaster recovery

# Office Automation

uniFLOW is a software platform designed to bring the full value of multi-functional devices to the organization. The modular structure of uniFLOW and the tight integration with Canon hardware allows the system to be built depending on the organization's exact requirements.

With uniFLOW, you can move your business forward like never before.

## Facts:

- ✓ Cost of printing in color is about 7 times more expensive than black and white.
- ✓ Expenditure on document output amounts to about 3% of total business revenue.
- ✓ Most organizations don't even know how many hard copy devices they have in their enterprise.
- ✓ Document security breaches can cost companies an average of \$6 million.

uniFLOW output management solution is customized to help keep your business healthy through following steps:

- ✓ Tracking your Printing costs
- ✓ Optimizing resources and maintaining up-time
- ✓ Reducing waste and increasing responsibility
- ✓ Auditing document content

Optimizing your organization's color printing with Canon's Multifunction printers and document solutions can dramatically improve your overall business health through cutting wastage.

- ✓ Over 61% of organizations have saved money when deploying color strategically in their organizations.
- ✓ 78% of organizations do not have the tools to restrict their employees from printing in color.

## Video Management Solution

Physical Security Solutions is an integration of systems to protect goods, person, and information and core component technologies indispensable to an organization.

Physical Security has quickly evolved from standalone deployments in a slowly innovating industry and virtually no integration with business processes, into a broad-based, highly-networked and increasingly strategic market for organizations. The industry is turning toward standards-based solutions that integrate within existing Ethernet infrastructures and provide higher degrees of manageability and reliability, lower Total Cost of Ownership (TCO), and application integration.

Network Techlab believes in creating a workplace environment where your employees feel safe is of the utmost importance. Feelings of safety and comfort are key to overall productivity and success. Your employees will feel more comfortable knowing that any strangers or guests on-site have been processed through a Visitor Management solution and screened accordingly.

At their most basic level, our Visitor Management solution perform the important task of tracking who is on your premises. More advanced VMS can track when guests arrive, limit where they are allowed to go, control the length of their stay and even screen them against publicly available background data. Simply put, Visitor Management solution give you maximum control over the guests accessing your facilities, a key aspect to keeping those facilities safe and secure.

**Visitor management Solution:**

Traditional Visitor logs (manual & computer based) have visitor data as provided by the visitor. It is very easy to defeat the system by providing incorrect data. Visitor's data security is also at a risk since it is kept open for anyone to read.

VAMS® application captures crucial visitor details like their mobile number and photograph and authenticates their mobile number (which under KYC norms is validated data). This helps in maintaining an authentic data set for better security.

It facilitates faster registration in offices and avoidance of repeatedly writing personal details. It provides dependable visitor data for the company's record and helps in protecting visitor's information from misuse.

**Basic Infrastructure Required****Essential Requirements:**

- Basic PC (160 GB HDD, 1 GB RAM)
- Webcam
- Internet

**Optional Hardware:**

- Printer (To Print the pass)
- Bar code Scanner (Scanning hardware serial numbers)
- External Numeric Keypad

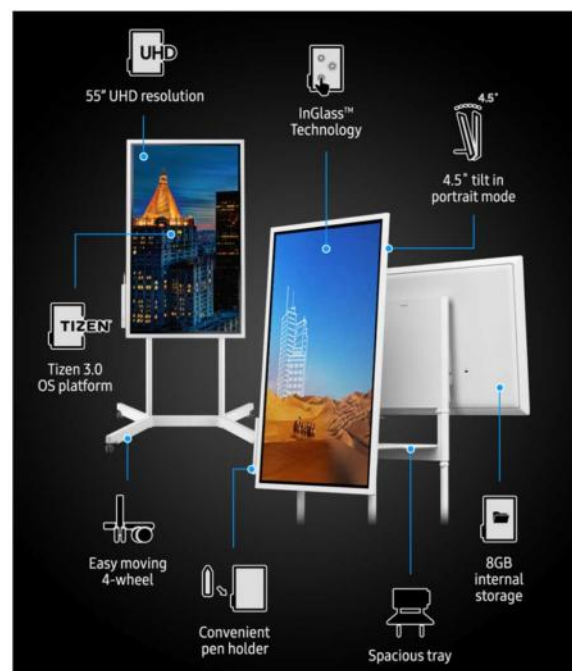

## Audio Visual Solution

**Samsung e-board: Flip navigation****Transform the Modern Meeting**

The meeting is the foundation of today's business world. It also can be one of its most challenging elements. Between preparing and moving supplies, finding a room and making sure every voice is heard, it's easy for game-changing ideas to get lost in the process. To capture all the ideas and streamline the main agenda of corporate meetings, Network Techlab Introduces the Samsung Flip, an interactive display that drives more productive and efficient collaboration without the hassle. With the Samsung Flip, meetings can take place anywhere and at any time, with all vital elements included. Business meeting logistics no longer need to be stressful. Envision how the Samsung Flip can help you and your team work smarter, faster and better.

**Flip Experience**

Take your traditional meeting to the next level. Through the Samsung Flip's mobile connectivity, you can introduce images, charts or other essential files directly from your personal devices...all in a clear, easy-to-read format. Better yet, the Samsung Flip expands creativity without sacrificing comfort, providing the same familiar writing experience as that of a standard analog board or piece of paper. Expand your collaborative capabilities without losing the meeting essentials.

**Product Highlights:**

- Easy Note-Taking on the E-LED Screen
- Lets You Write As You Would on Paper
- Intuitive Navigation
- UHD Picture Quality
- Portrait and Landscape Orientations
- Sync Chart and Laptop/Mobile Devices
- Easily Save and Share Meeting Minutes
- Password Protection for Content
- HDMI, USB 2.0, Touch Out 1 & RJ45 Ports
- Optional, Portable Wheeled Stand

With the Samsung Flip, meetings can take place anywhere and at any time, with all vital elements included. Business meeting logistics no longer need to be stressful.
