

POWERFUL FOUNDATION OF YOUR NETWORK

SAFE, SECURED, SEAMLESS

Technology evolves every day. Make your infrastructure flexible so that you adopt this change at right time. Jerky and messy cablings can hold you back from innovation and growth. Our Structure Cabling Solutions enables your infrastructure for a quick adoption so that you add any piece of hardware whenever needed.

Why Structure Cabling is important?

A good infrastructure is always backed with a futureproof cabling that provides higher bandwidth, reliable user experience and supports business growth. In today's competitive business world, having adaptable IT that is scalable and can be ready for the quick industry change. Structure cabling can assure deployment of new services and supports emerging business applications in future.

Datacenter Cabling

We provide datacenter cabling solutions that enhances efficiency, scalability and easy troubleshooting. Your journey of cluttered data center with wires to a neat and clean datacenter requires design thinking, project planning, expertise and resources on right time. We have it all, hence our customers relies on us for new datacenter setups as well as hassle-free migrations and colocations.

Office Cabling

Users working in the organization requires seamless connectivity across the workplace/office. Structure cabling in the office enables users for right connectivity so that they don't interrupt their work with cluttered environment. A well design networking module with Switches, Cables, IO's and patch cords keeps your office environment neat and clean. We have done several office cabling projects which are scalable and flexible for new hardware upgrades.

Business benefits of Structure Cabling

Save Time and Money

A well planned cabling save time of the users while they connect to network every time and strong cable management saves the cost of future problems.

Reduces Troubleshooting Errors

Structure cabling enables your IT team to trouble shoot faster by determining port and user's connectivity.

Reduces a risk of downtime

Structured cabling enables end-to-end numbering, tagging, documentation of user desk port to Cable Panel. Panel to Switch Port, User desk port marking on the layout, all this helps IT engineer to reduce the downtime & even they can work by removing the patch cable in live setup for dignaostics.

Enables Hygienic Environment

Organized cables with proper grouping based on their functionality save a lot of space and hide the cables that look aesthetically good. Structure Cabling allows airflow of cold air that reduces the humid environment in the cabling setup and helps in future expansion.

Lowers the temperature

Clutter free wires reduces the temperature overall and delivers faster transfer.

Enables Future Expansion

Structure cabling works well when it comes to scalability, increased or decreased user ports can be managed easily and provisions the future expansion.
